Warmly recommended: efficient, safe and economical

Gas condensing technology

"We hardly notice our heating system. It is extremely quiet, easy to use, doesn't take up much space and is also very economical. We're pleased we opted for the Daikin gas condensing boiler for our heating and hot water. Our installer recommended it and it was definitely the right choice for us."

A satisfied householder

The best response to rising prices: efficiency

Traditional energy is becoming increasingly precious and expensive. So when you are choosing a new boiler for your heating system you need to consider carefully the likely cost of fuel over the next 15 years. Gas condensing systems from Daikin are developed and manufactured to deliver benefits of the very latest combustion and thermal technology – ensuring ongoing efficiency and economical operation.

Optimum technology, maximum efficiency, minimum footprint – the Daikin EKOMBGU

State-of-the-art energy saving condensing technology converts fuel into available heat, with virtually no energy losses. Thanks to this, the Daikin EKOMBGU achieves up to 89.1% efficiency (SAP 2012), along with minimal individual parts, increasing boiler reliability and reduced maintenance costs, setting Daikin gas condensing boilers apart.

Heating: **A**

Hot water up to: **A+++***

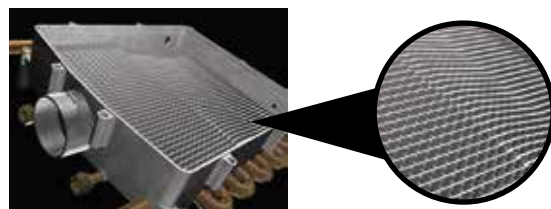

* When combined with solar thermal products

Hot water at any time

The Daikin EKOMBGU boiler delivers hygienic domestic hot water in one of two ways: instantaneously – like a combi boiler – or, for homes with heavier demands for hot water, via a storage cylinder. It can also be used in conjunction with a Daikin high performance thermal store, adding the option of solar energy to generate heating and hot water with added energy saving and lower fuel costs.

Innovative heat exchangers

Labyrinth fins – that provide a larger heat exchanger surface – and a high efficiency pump combine to increase overall efficiency in the Daikin EKOMBGU.

Netatmo: Smart thermostat app gives you remote control

Get Netatmo to adjust your home temperature with an easy-to-use smartphone app – from your armchair, or the other side of the world. Netatmo is just like a normal thermostat, but it has a wi-fi link for remote operation by smartphone, tablet or computer. You are in full control as it programs heating to suit your lifestyle, cutting your energy bills by up to 37% – with regular reports to prove it.

Efficiency, reliability and easy installation makes it the perfect choice for you and your installer...

Installation and maintenance

The boiler has a compact product design including a pre-assembled expansion vessel, and all necessary valves providing quick and easy installation in even the smallest spaces. All components are easily accessible to make maintenance easier, too.

Our network of accredited installers is comprehensively trained on Daikin systems at one of our five fully-equipped training centres. They are able to advise on the best options for your home – and many offer annual maintenance programmes to keep your boiler in peak condition and meet the conditions of the warranty.

After-sales service

Daikin UK has a national network of after sales service engineers, available to respond rapidly to emergencies. They rely on Daikin's readily available spare parts so any inconvenience to you is minimised. Should you need us, our dedicated householder helpline is open 7 days a week.

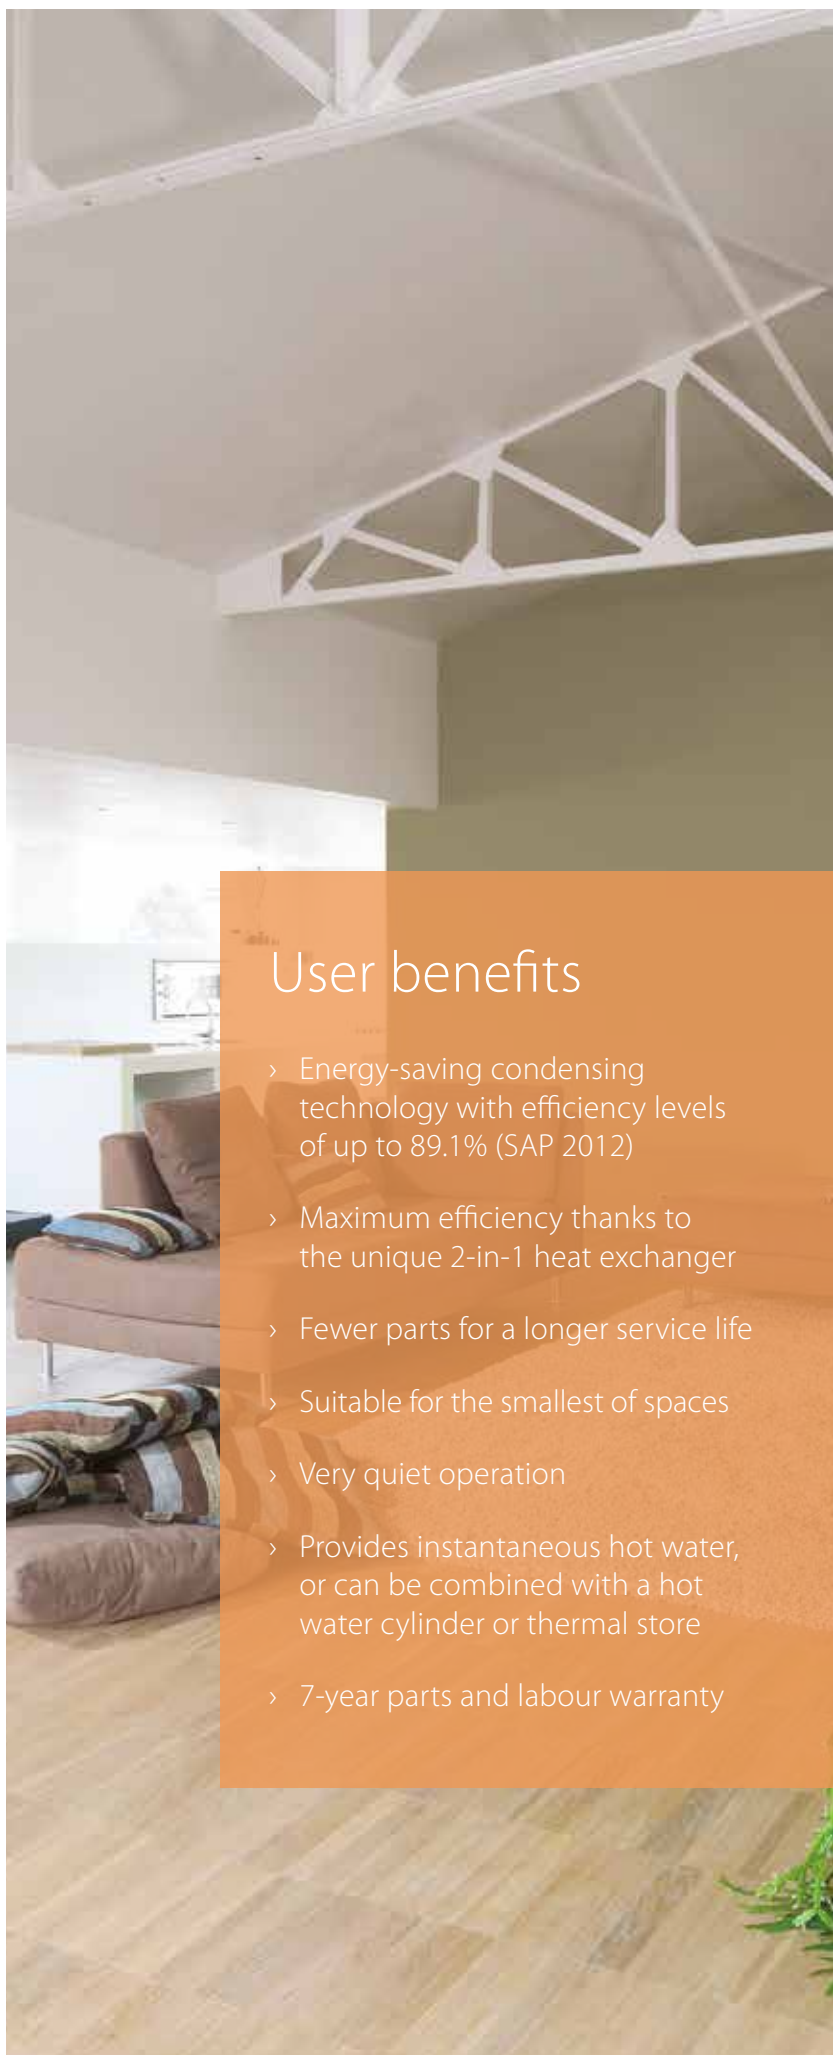

Warranty and guarantee

As with all Daikin systems, the EKOMBGU boiler is backed by our unique 7-year end-user parts and labour warranty and the boiler's heat exchanger specifically comes with a 10-year guarantee against manufacturing defects - all designed to give you complete peace of mind.

User benefits

- › Energy-saving condensing technology with efficiency levels of up to 89.1% (SAP 2012)
- › Maximum efficiency thanks to the unique 2-in-1 heat exchanger
- › Fewer parts for a longer service life
- › Suitable for the smallest of spaces
- › Very quiet operation
- › Provides instantaneous hot water, or can be combined with a hot water cylinder or thermal store
- › 7-year parts and labour warranty

Trust Daikin

Daikin UK offers the most efficient heating, ventilation and air conditioning solutions, renowned for design excellence, quality and reliability. So our customers can depend on Daikin for the ultimate in comfort.

Daikin UK has always prided itself on providing energy efficient and affordable heating solutions. And while we believe domestic heat pumps offer a future that makes greater use of renewable energy, we are also committed to offering options for every situation.

For some householders, energy efficient condensing boilers offer a value-for-money solution for existing dwellings. As a result, Daikin UK is expanding its portfolio of heating appliances with a range of state-of-the-art gas condensing boilers.

Compatible with a range of heat emitters, Daikin's boiler complements our industry-leading range of hybrid, heat pump and solar systems - all available exclusively from Daikin UK.

The Daikin EKOMBGU product range can cover every demand, offering maximum convenience and maximum efficiency - without compromise.
